Dear Delaware Resident,

Did you know that although birth control (contraception) is widely used, the majority of unplanned pregnancies result from non-use, misuse, or inconsistent use of a contraceptive method? Many women choose not to use birth control because they've experienced negative side effects or they haven't found a method that meets their needs. Better understanding of women's reproductive health and their experiences using birth control is a very important issue in your state.

I am writing to ask for your help with an important study concerning women's reproductive health. Please have **a female in your household age 18-44** complete this survey online. If there is **no** female in your household age 18-44, then please visit the survey link to let us know.

The information you provide will help us better understand the methods of birth control that women use and how they feel about those methods. We will also ask about experiences receiving medical care and other issues related to health and well-being. Only through your participation can this study be a success.

Your unique login information is below:

Survey URL: <https://DEWomen.norc.org>

Your Personal Access Code: [PIN]

We have included \$5 as a token of appreciation. If you are eligible for the survey, we will offer you a \$10 Amazon.com Gift Card¹, Target eGiftCard^{TM2} or Walmart eGift Card³. These gift codes can be used online or in stores.

The survey should take approximately 15 minutes to complete. **You do not have to be using a birth control method to participate.** Participation in this study is voluntary. You may choose not to answer any question that you do not wish to answer. You can end your participation at any time. All information collected for this study will be kept confidential.

Again, your willingness to complete the survey about your reproductive health is very important for the success of this study. Your household has been scientifically selected and cannot be replaced. If you have questions about the study, please email us womenshealth@norc.org or call toll-free at 1-877-396-4064.

Thank you very much for your help with this important study.

Sincerely,

Dear Delaware Resident,

We recently sent a letter requesting your participation in an important study on women's reproductive health. According to our records, we have not yet received a response from your household. We just wanted to let you know that the study is coming to an end and this is your last chance to participate.

If a female in your household has already completed this survey, please accept our sincere thanks. If not, we have enclosed a paper copy of the survey in this packet for your convenience.

Because your household is one of a small number randomly chosen to participate in the survey, we really need your help to make it a success. You do not have to be using a birth control method to participate. Participation is voluntary and your opinions are extremely important to us.

We ask that a **female from your household aged 18-44 complete the enclosed survey** and return it to us in the postage-paid envelope. If you are eligible for the survey, we will offer you a \$10 electronic Amazon.com Gift Card¹, Target eGiftCard^{TM2} or Walmart eGift Card³. Whichever gift code you select, it can be used online or in stores. If there is no female in your household age 18-44, then please complete questions 1 and 2 and return it to us in the enclosed envelope or log on to the survey at <https://DEWomen.norc.org> to let us know.

The questions should only take about 15 minutes to complete. The information you provide will be used by the research team for statistical purposes only and we will not disclose your information to third parties.
