

Field Experiments in Population and Development

Susan Parker and panel

University of Maryland

Friday, March 9

12:00 PM - 1:30 PM

1101 Morrill

About the Presentation

The use of randomized experiments has revolutionized the field of development, bringing a new emphasis on evaluation of policies for improving well-being around the world. This session brings MPRC Faculty Research Associates from across campus to present their research on the use of randomized control trials in topics related to Population and Development. Faculty from the Economics Department, the Agricultural and Resource Economics Department, and the School of Public Policy will participate in the panel discussion.

Panel includes:

Susan Parker, Public Policy

Jessica Goldberg, Economics

Pamela Jakiela, Agriculture and Resource Economics

Ken Leonard, Agriculture and Resource Economics

MPRC
Maryland Population Research Center
